Tustin Begins Pest Control at Future Tustin Legacy Community Park Site

The City of Tustin has contracted for pest control services to be conducted at the future Tustin Legacy Community Park Site, along the west side of Severyns Road (from Valencia Avenue to north of Charleston Street) adjacent to the Columbus Square neighborhood at Tustin Legacy later this month. Pest control activities will be conducted between the hours of 7 a.m. and 6 p.m. during business weekdays. The measure is being taken to protect the future park site and adjacent properties from burrowing, non-vector pests. The City has retained Active Pest Control to provide initial pest control services and ongoing maintenance. Active Pest Control uses state certified technicians to perform the treatments, including the use of odorless materials as part of its control activities.

Should you have any questions, please contact Matt West at (714) 573-3116 at the City.
