

Patrick Sudbeck

Patrick D. Sudbeck served in the USAF from 1981 to 2001. He entered the Air Force from Tustin, California. His military career included assignments at Beale Air Force Base (AFB) California, Kadena Air Force Base Japan, Loring AFB Maine, Tinker AFB Oklahoma, and the Joint Test Force at Boeing Defense Facility in Seattle, Washington.

Aircraft experiences included KC-135 Stratotanker, C-5 Galaxy, C-141 Starlifter, KC-46 Pegasus, and JE-3C Airborne Warning and Control Systems (AWACS) aircraft.

After a 20-year military career with the USAF, he was hired by Boeing Defense organizations as Laboratory and Ground Operations and Manufacturing Engineer supporting AWACS mission and air vehicle modifications and upgrades. He participated in and supported testing of upgrades to AWACS providing system performance and reliability before retrofitting onto the USAF fleet aircraft.
