Executive Summary

The City of Tustin engaged Willdan Financial Services (Willdan) to determine the full costs incurred by the City to support the various activities for which the City charges user fees. Due to the complexity and the breadth of performing a comprehensive review of fees, Willdan employed a variety of fee methodologies to identify the full costs of individual fee and program activities. This report and the appendices herein identifies 100% full cost recovery for City services and the recommended level of recovery as determined through discussion with departmental staff.

The reality of the local government fee environment is that significant increases to achieve 100% cost recovery can often not be feasible, desirable, or appropriate depending on policy direction —particularly in a single year. The recommended fees identified herein are either at or less than full cost recovery.

User Fee Background

Background

As part of a general cost recovery strategy, local governments adopt user fees to fund programs and services that provide limited or no direct benefit to the community as a whole. As cities struggle to maintain levels of service and variability of demand, they have become increasingly aware of subsidies provided by the General Fund and have implemented cost-recovery targets. To the extent that governments use general tax monies to provide individuals with private benefits, and not require them to pay the full cost of the service (and, therefore, receive a subsidy), the government is limiting funds that may be available to provide other community-wide benefits. In effect, the government is using community funds to pay for private benefit. Unlike most revenue sources, cities have more control over the level of user fees they charge to recover costs, or the subsidies they can institute.

Fees in California are required to conform to the statutory requirements of the California Constitution, Proposition 218, and the California Code of Regulations. The Code also requires that the City Council adopt fees by either ordinance or resolution, and that any fees in excess of the estimated total cost of rendering the related services must be approved by a popular vote of two-thirds of those electors voting because the charge would be considered a tax and not a fee.

California User Fee History

Before Proposition 13, California cities were less concerned with potential subsidies and recovering the cost of their services from individual fee payers. In times of fiscal shortages, cities simply raised property taxes, which funded everything from police and recreation to development-related services. However, this situation changed with the passage of Proposition 13 in 1978.

Proposition 13 established the era of revenue limitation in California local government. In subsequent years, the state saw a series of additional limitations to local government revenues. Proposition 4 (1979) defined the difference between a tax and a fee: a fee can be no greater than the cost of providing the service; and Proposition 218 (1996) further limited the imposition of taxes for certain classes of fees. As a result, cities were required to secure a supermajority vote in order to enact or increase taxes. Since the public continues to resist efforts to raise local government taxes, cities have little control and very few successful options for new revenues. Compounding this limitation, the State of California took a series of actions in the 1990's and 2000's to improve the State's fiscal situation—at the expense of local governments. As an example, in 2004-05, the Educational Revenue Augmentation Funds (“ERAF”) take-away of property taxes and the reduction of Vehicle License Fees have severely reduced local tax revenues.

In addition, on November 2, 2010, California voters approved Proposition 26, the “Stop Hidden Taxes Initiative”, which is aimed at defining “regulatory fees” as a special tax rather than a fee, thus requiring approval by two-thirds vote of local voters. These regulatory fees are typically intended to mitigate the societal and environmental impacts of a business or person's activities. Proposition 26 contains seven categories of exceptions. The vast majority of fees that cities would seek to adopt will most likely fall into one or more of these exemptions.

Additional Policy Considerations

The recent trend for municipalities is to update their fee schedules to reflect the actual costs of certain public services primarily benefitting users. User Fees recover costs associated with the provision of specific services benefitting the user, thereby reducing the use of General Fund monies for such purposes.

In addition to collecting the direct cost of labor and materials associated with processing and administering user services, it is common for local governments to recover support costs. Support costs are those costs relating to a local government's central service departments that are properly allocable to the local government's operating departments. Central services support cost allocations were incorporated using the resulting indirect overhead percentages determined through the Cost Allocation Plan. This plan was developed prior to the User Fee study to determine the burden placed upon central services by the operating departments in order to allocate a proportionate share of central service cost.

As labor effort and costs associated with the provision of services fluctuate over time, a significant element in the development of any fee schedule is that it has the flexibility to remain current. Therefore, it is recommended that the City include an inflationary factor in the resolution adopting the fee schedule to allow the City Council, by resolution, to annually increase or decrease the fees.

The City may employ many different inflationary factors. The most commonly used inflator is some form of the Consumer Price Index (CPI) as it is widely well known and accepted. A similar inflator is the implicit price deflator for GDP, which is much like the CPI except that while the CPI is based on the same "basket" of goods and services every year, the price deflators' "basket" can change year to year. Since the primary factor for the cost of a City's services is usually the costs of the personnel involved, tying an inflationary factor that connects more directly to the personnel costs can be suitable if there is a clear method, or current practice of obtaining said factor.

Each City should use an inflator that they believe works the best for their specific situation and needs. It is also recommended that the City perform this internal review annually with a comprehensive review of services and fees performed every three to five years, which would include adding or removing fees for any new or eliminated programs/services, as well as updating the underlying cost and personnel data.

Study Objective

As the City of Tustin seeks to efficiently manage limited resources and adequately respond to increased service demands, it needs a variety of tools. These tools provide assurance that the City has the best information and the best resources available to make sound decisions, fairly and legitimately set fees, maintain compliance with state law and local policies, and meet the needs of the City administration and its constituency. Given the limitations on raising revenue in local government, the City recognizes that a User Fee Study is a very cost-effective way to understand the total cost of services and identify potential fee deficiencies. Essentially, a User Fee is a payment for a requested service provided by a local government that primarily benefits an individual or group.

The total cost of each service included in this analysis is based on the full cost of providing City services, including direct salaries and benefits of City staff, direct departmental costs, and indirect costs from central service support. This study determines the full cost recovery fee for the City to provide each service; however, each fee is set at the City's discretion, up to 100% of the total cost, as specified in this report.

The principle goal of the study was to help the City determine the full cost of the services that the City provides. In addition, Willdan established a series of additional objectives including:

- Developing a rational basis for setting fees
- Identifying subsidy amount, if applicable, of each fee in the model
- Ensuring compliance with State law
- Developing an updatable and comprehensive list of fees
- Maintaining accordance with City policies and goals

The study results will help the City better understand its true costs of providing services and may serve as a basis for making informed policy decisions regarding the most appropriate fees, if any, to collect from individuals and organizations that require individualized services from the City.

Scope of the Study

The scope of this study encompasses a review and calculation of the user fees charged by the following Tustin departments and fee groups:

- City Clerk
- Finance
- Water Billing
- Police
- Building
- Planning
- Economic Development
- Engineering
- Parks and Recreation

The study involved the identification of existing and potential new fees, fee schedule restructuring, data collection and analysis, orientation and consultation, quality control, communication and presentations, and calculation of individual service costs (fees) or program cost recovery levels.

Aim of the Report

The User Fee Study focused on the cost of City services, as City staff currently provides them at existing, known, or reasonably anticipated service and staff levels. This report provides a summary of the study results, and a general description of the approach and methods Willdan and City staff used to determine the recommended fee schedule. The report is not intended to document all of the numerous discussions throughout the process, nor is it intended to provide influential dissertation on the qualities of the utilized tools, techniques, or other approaches.

Project Approach and Methodology

Conceptual Approach

The basic concept of a User Fee Study is to determine the “reasonable cost” of each service provided by the City for which it charges a user fee. The full cost of providing a service may not necessarily become the City’s fee, but it serves as the objective basis as to the maximum amount that may be collected.

The standard fee limitation established in California law for property-related (non-discretionary) fees is the “estimated, reasonable cost” principle. In order to maintain compliance with the letter and spirit of this standard, every component of the fee study process included a related review. The use of budget figures, time estimates, and improvement valuation clearly indicates reliance upon estimates for some data.

Fully Burdened Hourly Rates

The total cost of each service included in this analysis is primarily based on the Fully Burdened Hourly Rates (FBHRs) that were determined for City personnel directly involved in providing services. The FBHRs include not only personnel salary and benefits, but also any costs that are reasonably ascribable to personnel. The cost elements that are included in the calculation of fully burdened rates are:

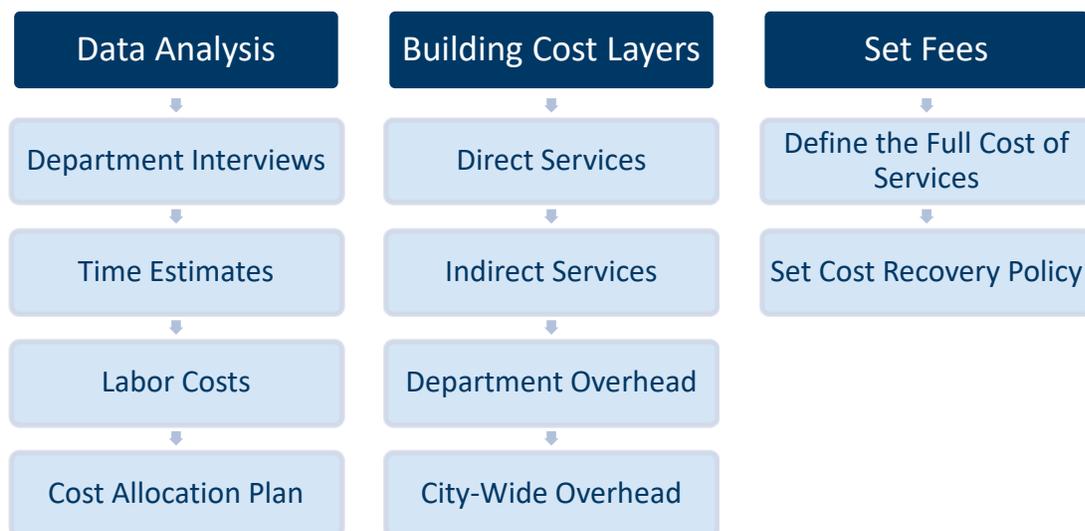

- Salaries & benefits of personnel involved
- Operating costs applicable to fee operations
- Departmental support, supervision, and administration overhead
- Internal Service Costs charged to each department
- Indirect City-wide overhead costs

An important factor in determining the fully burdened rate is in the calculation of productive hours for personnel. This calculation takes the available workable hours in a year of 2,080 and adjusts this figure to account for calculated or anticipated hours’ employees are involved in non-billable activities such as paid vacation, sick leave, emergency leave, holidays, and other considerations as necessary. Dividing the full cost by the number of productive hours provides the FBHR.

The FBHRs are then used in conjunction with time estimates, when appropriate, to calculate a fees' cost based on the personnel and the amount of their time that is involved in providing each service.

Summary Steps of the Study

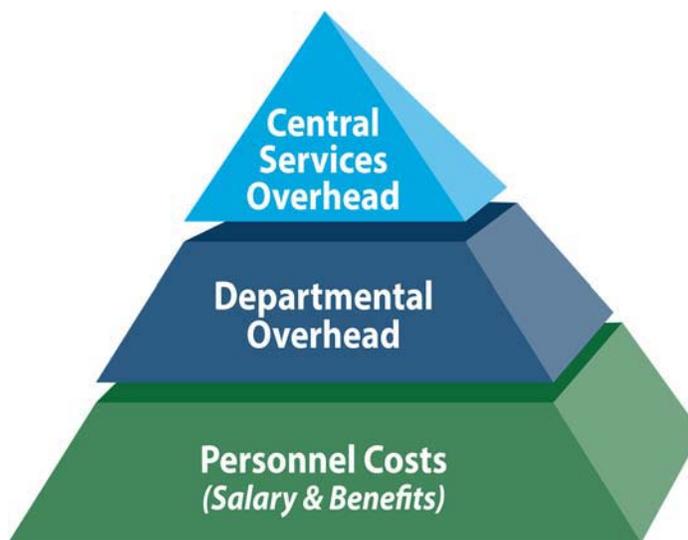

The methodology to evaluate most User Fee levels is straightforward and simple in concept. The following list provides a summary of the study process steps:

Allowable Costs

This report identifies three types of costs that, when combined, constitute the fully burdened cost of a service (**Appendix A**). Costs are defined as direct labor, including salary and benefits, departmental overhead costs, and the City’s central services overhead, where departmental and central service overhead costs constitute support costs. These cost types are defined as follows:

- **Direct Labor (Personnel Costs):** The costs related to staff salaries for time spent directly on fee-related services.
- **Departmental Overhead:** A proportional allocation of departmental overhead costs, including operation costs such as supplies and materials that are necessary for the department to function.
- **Central Services Overhead:** These costs, represent services provided by those Central Services Departments whose primary function is to support other City departments. The calculations utilized the de minimus rate of 10% proscribed by 2 CFR Part 200 Cost Principles for use in organizations that do not have a cost allocation plan.

Methodology

The three methods of analysis for calculating fees used in this report are the:

Case Study Method (Standard Unit Cost Build-Up Approach): This approach estimates the actual labor and material costs associated with providing a unit of service to a single user. This analysis is suitable when City staff time requirements do not vary dramatically for a service, or for special projects where the time and cost requirements are easy to identify at the project's outset. Further, the method is effective in instances when a staff member from one department assists on an application, service or permit for another department on an as-needed basis. Costs are estimated based upon interviews with City staff regarding the time typically spent on tasks, a review of available records, and a time and materials analysis.

Programmatic Approach: In some instances, the underlying data is not available or varies widely, leaving a standard unit cost build-up approach impractical. In addition, market factors and policy concerns (as opposed to actual costs) tend to influence fee levels more than other types of services. Willdan employed a different methodology where appropriate to fit the programs' needs and goals. Typical programmatic approach cases are facility use fees, penalties, and instances where a program cost is divided over the user base to obtain a per applicant cost for shared cost services.

Valuation Based Fees: This manner of collection is used when the valuation of the improvement can be used as a proxy for the amount of effort it would take for City staff to complete the service provided. More specifically, this approach is commonly used for certain User Fees in the Building Division. It is generally accepted that as a project's size scales up, the cost of the project increases, and the amount of effort needed to review and inspect also increases. It is also generally true that the more complex the type of construction, the more the cost, and time needed to review and inspect. Using a valuation-based fees provides for a system that can adjust as project sizes scale. Land is not included in valuation determination.

Quality Control/Quality Assurance

All study components are interrelated, thus flawed data at any step in the process will cause the ultimate results to be inconsistent and unsound. The elements of our Quality Control process for User Fee calculations include:

- Involvement of knowledgeable City staff
- Clear instructions and guidance to City staff
- Reasonableness tests and validation
- Normalcy/expectation ranges
- FTE balancing
- Internal and external reviews
- Cross-checking

Reasons for cost increases/decreases over current fees

Within the fee tables in *Appendix D*, the differences are identified between the full costs calculated through the study and the fee levels currently in effect. The reasons for differences between the two can arise from a number of possible factors including:

- Previous fee levels may have been set at levels less than full cost intentionally, based on policy decisions
- Staffing levels and the positions that complete fee and service activity may vary from when the previous costs were calculated
- Personnel and materials costs could have increased at levels that differed from any inflationary factors used to increase fees since the last study
- Costs that this study has identified as part of the full cost of services may not have been accounted for in a previous study
 - Departmental overhead and administration costs
 - Vehicle and Facility Maintenance support costs
 - Indirect overhead from central service support
- Changes in processes and procedures within a department, or the City as a whole

City Staff Contributions

As part of the study process, Willdan received tremendous support and cooperation from City staff, which contributed and reviewed a variety of components to the study, including:

- Budget and other cost data
- Staffing structures
- Fee and service structures, organization, and descriptions
- Direct and indirect work hours (billable/non-billable)
- Time estimates to complete work tasks
- Frequency and current fee levels
- Review of draft results and other documentation

A User Fee Study requires significant involvement of the managers and line staff from the departments—on top of their existing workloads and competing priorities. The contributions from City staff were critical to this study. We would like to express our appreciation to the City and its staff for their assistance, professionalism, positive attitudes, helpful suggestions, responsiveness, and overall cooperation.

Tustin User Fees

Cost Recovery

The cost recovery models, by department/division fee type, are presented in detail in *Appendix D*. Full cost recovery is determined by summing the estimated amount of time each position (in increments of minutes or hours) spends to render a service. Time estimates for each service rendered were predominately determined by Willdan and City Staff through a time and materials survey conducted for each department/division fee included in the study. The resulting cost recovery amount represents the total cost of providing each service. The City's current fee being charged for each service, if applicable, is provided in this section, as well, for reference.

It is important to note that the time and materials survey used to determine the amount of time each employee spends assisting in the provision of the services listed on the fee schedule is essential in identifying the total cost of providing each service. Specifically, in providing services, a number of employees are often involved in various aspects of the process, spending anywhere from a few minutes to several hours on the service.

The principle goal of this study was to identify the cost of City services, to provide information to help the City make informed decisions regarding the actual fee levels and charges. The responsibility to determine the final fee levels is a complicated task. City staff must consider many issues in formulating recommendations, and the City Council must consider those same issues and more in making the final decisions.

City staff assumes the responsibility to develop specific fee level recommendations to present to the City Council. Unfortunately, there are no hard and fast rules to guide the City, since many of the considerations are based on the unique characteristics of the City of Tustin, and administrative and political discretion. However, in setting the level of full cost recovery for each fee, one should consider whether the service solely benefits one end user or the general community.

Subsidization

Recalling the definition of a user fee helps guide decisions regarding subsidization. The general standard is that individuals (or groups) who receive a wholly private benefit should pay 100% of the full cost of the services. In contrast, services that are simply public benefit should be funded entirely by the general fund's tax dollars. Unfortunately, for the decision makers, many services fall into the range between these two extremes. The graphic on the following page illustrates the potential decision basis.

Further complicating the decision, opponents of fees often assert that the activities subject to the fees provide economic, cultural, "quality of life," or other community benefits that exceed the costs to the City.

It is recommended the City consider such factors during its deliberations regarding appropriate fee levels.

Of course, subsidization can be an effective public policy tool, since it can be used to reduce fees to encourage certain activities (such as compliance inspections to ensure public safety) or allow some people to be able to afford to receive services they otherwise could not at the full cost. In addition, subsidies can

be an appropriate and justifiable action, such as to allow citizens to rightfully access services, without burdensome costs.

Despite the intent, it is important for the City and public to understand that subsidies must be covered by another revenue source, such as the General Fund. Therefore, the general taxpayer will potentially help to fund private benefits, and/or other City services will not receive funds that are otherwise directed to cover subsidies.

Impact on Demand (Elasticity)

Economic principles of elasticity suggest that increased costs for services (higher fees) will eventually curtail the demand for the services; whereas lower fees may spark an incentive to utilize the services and encourage certain actions. Either of these conditions may be a desirable effect to the City. However, the level of the fees that would cause demand changes is largely unknown. The Cost of Service Study did not attempt to evaluate the economic or behavioral impacts of higher or lower fees; nevertheless, the City should consider the potential impacts of these issues when deciding on fee levels.

Summary

If the City's principal goal of this study were to maximize revenues from user fees, Willdan would recommend setting user fees at 100% of the full cost identified in this study. However, we understand that revenue enhancement is not the only goal of a cost of service study, and sometimes full-cost recovery is not needed, desired, or appropriate. Other City and departmental goals, City Council priorities, policy initiatives, past experience, implementation issues, and other internal and external factors may influence staff recommendations and City Council decisions. City staff has reviewed the full costs and identified the "recommended fee levels" for consideration by City Council. The attached appendices exhibit these unit fees individually.

The preceding sections provide background for each department or division and the results of this study's analysis of their fees. For the full list of each fee and their analysis, refer to **Appendix D** of this report.

City Clerk

The City Clerk's Office facilitates the legislative policy-making process; records and validates the proceedings of the City Council and provides for timely and thorough access to public records. It administers the activities pertaining to City Council legislation, processes Council-approved agenda items, manages public records, and disseminates information concerning Council actions both to City staff and the public and conducts municipal elections.

Analysis

Willdan individually reviewed the services associated with the City Clerk. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The services listed under City Clerk consist of a few flat cost-based fees and others set by the State. The analysis of the cost-based services relied upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that services are currently being provided below full cost. As a result of the fee recommendations, there would be:

- An increase to the Witness Fee per the CA Government Code to \$275,
- 2 new fees would be added and;
- the remaining fees would remain as currently set as detailed in [Appendix D](#).

Finance

The Finance Division provides treasury services, financial services, accounts payable, purchasing, customer service, cashiering, and accounting support for the City, the Successor Agency to the Tustin Community Redevelopment Agency, the Water Utility, and the City's Special Assessment Districts. It is responsible for recording the financial activities of the City in accordance with generally accepted accounting principles and standards of the Government Accounting Standards Board.

Analysis

Willdan individually reviewed the services associated with Finance. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The services included in Finance services are a mixture of penalties, business license tax fees, and special regulatory business fees. Penalties should be set to deter the listed activities and were left unchanged. Business license tax fees were also left unchanged as they require a public vote in order for modification. Special regulatory business permits are cost recoverable activities provided by City staff and as such their analysis relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. The analysis found that current fees are set below the cost of providing service for all but one service. It is recommended that the City set the new fee at or near 100% cost recovery for all but the Appeal fee. As a result of the suggested fees in total for the Finance schedule there would be:

- An increase to 15 fees;
- 10 fees would remain as currently set;
- 13 new fees would be added, and;
- 1 fee would decrease as detailed in [Appendix D](#).

Water Billing

The Finance Department is responsible for Water Billing. Administrative functions of the Water Utility include customer service inquiries, rate analysis, meter reading, customer billings, cash management, financial analysis, and liaison to field operations in construction of major capital improvements, infrastructure, and ongoing operational maintenance.

Analysis

Willdan individually reviewed the services associated with Water Billing. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Water Billing services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. Water utility usage fees were not included in the analysis. The analysis found that most of the services being provided are currently set below their full cost. It is recommended that the City set Water Billing fees at the levels detailed in **Appendix D**. As a result, there would be:

- An increase to 9 fees;
- 10 fees would remain as currently set;
- 3 new fees would be added;
- 3 fees would decrease, and;
- The average fee change would be 29% as detailed in **Appendix D**.

Police

Police Management directs the day to day operations of the Police Department. Its primary responsibility is to ensure the Department's overall mission is achieved, and the department is well prepared for the future. Police Management provides leadership and management direction to all Police Department functions. Staff also responds to citizen contacts and represents the Police Department within the City, County and State. Additionally, Police Management is responsible for the oversight of the CALEA (Commission on Accreditation for Law Enforcement Agencies) process.

The City Operations Command consists of police personnel assigned to specialty assignment units which impact all areas within the City of Tustin borders. Its personnel are dedicated to supplement the Patrol Division in a variety of capacities such as the GRADE Unit, Traffic Unit, K-9 Unit, and SRT/SWAT. City Operations Command is currently staffed by one Lieutenant, three Sergeants, two Detectives, ten Officers and one police service dog.

The Special Operations Division includes the General Investigations Unit, which conducts widely varied and specialized criminal investigations, as well as proactive surveillance operations.

Analysis

Willdan individually reviewed the services and programs associated with the Police Department. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The services included in Police are a mixture of fines and user fees. The fines are set to deter the listed activities, and after staff conducted a survey of 18 cities, increases to most Tustin Municipal Code and, the analysis of the user fees relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that all services are currently under recovering the cost of providing them. Based on the suggested fees for the penalties and services listed under Police, there would be:

- An increase to 9 fees;
- 20 fees would remain as currently set, and;
- The average fee change would be 15% as detailed in [Appendix D](#).

Building

The mission of the Building Division is to ensure the safe and lawful use of buildings and properties by enforcing the California Building Standards Code and the Tustin Zoning Code. We are committed to improving our performance and developing procedures that are streamlined, understandable and transparent. We facilitate development within the community with integrity, efficiency, and professionalism. The Division is committed to becoming a premier municipal building organization, dedicated to enhancing the quality of life for all Tustin residents and businesses and making our city safer by reducing the risk associated with fire, and natural hazards such as earthquakes and flooding. The Building Division performs these tasks through implementation and enforcement of State and local Building, Residential, Plumbing, Electrical, Mechanical, Historical Building, Green Building, and Energy Codes, also known as the California Building Standards Code. The Building Division is comprised of three service sections: Plan Check/Permitting, Building Inspection, and Code Enforcement. Plan Check/Permitting and Building Inspection Services ensure that all construction proposals are completed in compliance with the California Building Standards Code. Code Enforcement staff members work with Planners, Building Inspectors, various State agencies, and other City staff to ensure that Tustin properties are well maintained, and that national water and air quality requirements are met.

Analysis

Willdan individually reviewed the services and programs associated with Building. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Building services relied primarily upon a standard unit cost build-up approach (except for fees related to the Building Permit program), whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and pro-rata share of departmental costs, including indirect costs for City Central Services. The analysis found that services are currently set below the full cost of providing them. For unit fees under Mechanical, Plumbing, and Electrical sections the services listed are not typically provided on a single use basis, but often combine multitudes within those sections. As such the suggested fees in those sections were limited in the cost recovery recommended. It is recommended that the City increase cost recovery for Building services to the levels shown for each fee as detailed in **Appendix D**. As a result, there would be:

- an increase to 93 fees;
- 6 fees would decrease;
- 16 fees would change from valuation to a flat amount;
- 4 fees would change from variable to a flat amount;
- 2 fees would change from flat to actual cost;
- 4 fees would change from flat to a deposit amount;
- 26 fees would remain as currently set;
- 23 new fees would be added, and;
- the average estimated average fee increase for the fees listed would be at around 33% for flat fee services as detailed in the Building table within **Appendix D**.

In addition to the above referenced fees listed under Building, the Building Permit fees are also provided by this division. For the Building Permit fees, valuation is used as a proxy for measuring the amount of effort needed to provide services on a case by case basis. This method is an industry standard widely used by other California cities and counties to evaluate the cost of providing service. It is generally understood that the larger and more complex a project is, more time and effort that is required to provide the service. Project valuation also follows that trend where additional square footage for a building type increase the total valuation. At the same time different construction projects carry different costs of construction per square foot that correspond to more complex construction needs and would also correspond to additional plan review and inspection time needed by staff. So, by using a combination of project valuation and historical revenue figures to calculate a cost multiplier and a cost recovery analysis for historical and anticipated future construction trends, current cost recovery along with variability in charges due to project type and scale is determined. The result of the cost analysis completed using fee activity going back to fiscal year 2009/10 for Building Permits and found that the program is currently operating at 63% cost recovery. It is recommended that the fees be increased to raise cost recovery to 100%, which would require a 59% increase. Current and new fees are detailed in **Appendix D**.

Planning

The Planning Division includes current and advance planning/special project functions. The current planning reviews proposed development to ensure conformance with City zoning and development standards; processes discretionary entitlements; performs plan checks; and answers planning and business license related land use inquiries and requests. The advanced planning and special projects is responsible for managing Community Development Block Grant (CDBG) activities and overseeing and coordinating demographics, regional activities, historic preservation, General Plan and Code amendments, environmental studies, business license zoning clearances and business permits, and special projects. Current and Advance Planning staff provide support to the City Council and Planning Commission.

Analysis

Willdan individually reviewed the services and programs associated with Planning. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Planning Services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. Planning utilizes deposits for many services where an amount is collected upfront and staff records time against the deposit amount using the hourly rates detailed in [Appendix B](#). Additional funds are requested from the applicant, as needed, to complete the requested service. If funds are unused above the City's return policy threshold, they are returned. Deposits are set at reasonable levels based upon the complexity of the request. The analysis found that flat rate fees were regularly set below the full cost of providing the service. It is recommended that the City set most Planning Division fees at or near 100% cost recovery for most fees as detailed in [Appendix D](#), with some specific fees set to retain subsidies. As a result, there would be:

- an increase to 39 fees;
- 1 fee would decrease;
- 5 new fees will be added;
- 11 fees will become deposit based instead of actual cost, flat fees or % of application fee, and;
- 17 fees would remain as currently set.

Economic Development

The Economic Development Department provides leadership as the Executive Developer of Tustin Legacy, assists businesses and property owners, manages City real estate, facilitates workforce housing, and oversees Successor Agency activities.

Analysis

Willdan individually reviewed the services and programs associated with Economic Development. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

There are two services listed under Economic Development. One is a flat rate service, titled Subordination Processing Fee and the cost-based analysis found that the current fee is set below the full cost of providing it. There is no recommended change to the \$280 rate being charged for this service. The second is a new penalty titled Annual Monitoring Late Fee. The recommended amount for this new penalty is \$250. These fees are detailed under Economic Development in [*Appendix D*](#).

Engineering

The Engineering Division designs and prepares plans for the City's Capital Improvement Program; prepares public works conditions of approval for entitlements; plan checks subdivision plans and maps; inspects all projects within the public right-of-way; maintains records to promote the general safety and well-being of the community; and coordinates all inter/intra community related regional traffic matters pertinent to pedestrian and vehicular safety.

Analysis

Willdan individually reviewed the services and programs associated with Engineering. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Engineering Services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that current fee levels are subsidizing the cost of service. It is recommended that the City set most Engineering Services fees at or near 100% cost recovery for most fees as detailed in [Appendix D](#), with some specific fees set to retain subsidies. As a result, there would be:

- an increase to 22 fees;
- 1 fee would decrease;
- 6 new fees would be added;
- 11 fees would change from flat to Actual Cost;
- 23 fees would remain as currently set, and;
- the average estimated fee increase would be around 57% for flat fee services.

Parks and Recreation

The Administrative Services Division provides coordination to manage the planning, acquisition, and rehabilitation of park and recreation facilities and provides administration services and leadership to department operations

The Senior Services Division is responsible for the operation and programming of the Tustin Area Senior Center. The primary mission of this division is to provide a wide variety of recreational, educational, social, and human services. These activities are accomplished in collaboration with a variety of regional and local service organizations.

The Support Services Division is responsible for providing logistical support for City special events and meetings at City Hall/Civic Center, Columbus Tustin Activity Center, Tustin Area Senior Center, Tustin Family and Youth Center, Tustin Library, Citrus Ranch Park, and the Tustin Community Center. In addition, this division performs custodial duties in providing a clean, safe environment for city employees and the general public.

The Sports Services Division provides active recreation programs through the utilization of sports, fitness, and instructional classes that provide all ages the opportunity for supervised, active, recreation programs. In addition, this division is responsible for coordination of the after-school program and summer day camps at Columbus Tustin Activity Center.

The Classes/Cultural Services Division promotes and coordinates recreational classes for community adults' seniors, and youth. The division is responsible for program publicity, including the production of the Tustin Today quarterly activity guide, procurement of instructors and classroom space, and implementation of class registration procedures.

The Tustin Youth Center Division is responsible for the operation and programming of the Tustin Family and Youth Center. The primary mission of this division is to provide a wide array of recreational activities and human services for families and youth of the southwest area of Tustin. These activities and services are presented in collaboration with a variety of regional and local service organizations and agencies.

Analysis

Willdan individually reviewed the services and programs associated with the Parks and Recreation Department. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of most Parks and Recreation programs encompassed facility rentals and other recreation services. The fee for use for government owned facilities and property can be set discretionally by the City, typically based on past usage characteristics, policy goals, and surrounding jurisdiction comparison. The cost of capital acquisition, maintenance, repair, and upgrade to the City and subsequently the public is offset through rental or use fees. As such these fees should be set using the knowledge of activity use for the facilities, policy desires of the City, and market factors when desirable. It is generally accepted that some Recreation programs provide a measure of public benefit to the residents and City as a whole, and as such is it common for services to bear significant subsidies. In addition, cities generally want to ensure that their programs and services remain affordable to the community at large, and that the programs remain

competitive with surrounding jurisdictions. Overall Parks and Recreation cost recovery was analyzed and is shown in **Appendix C** to be about 51.5%. The suggested fees detailed in **Appendix D** are projected to only increase cost recovery to 51.8%, and would result in:

- An increase for 40 fees;
- 38 fees would decrease;
- 6 new fees will be added, and;
- 173 fees would remain as currently set as detailed in **Appendix D**.

Appendix A – Total Allowable Cost to be Recovered

Below are the total department costs for those departments included in the fee study. However, only a percentage of the total cost is realized as staff does not just work on services related to User Fees, but also works on an array of other City functions during the operational hours of the City. The amounts listed below will not reconcile to City budgets as costs that should not be included in overhead for personnel in the application of determining fully burdened hourly rates were excluded. Examples of these costs are capital, debt, monetary transfers, passthrough contract costs, and any other costs that are charged directly to the service requestor.

City of Tustin - User Fee Overhead Rate Calculations

Department	Salary and Benefits	Department Operations & Administration	Direct Overhead %	Vehicle and Facility Maintenance Allocation	Vehicle and Facility Maintenance OH %	Indirect Allocation %
City Clerk	566,100	168,100	29.7%	76,623	13.5%	0.0%

Appendix B – Fully Burdened Hourly Rates

Below are fully burdened hourly rates (FBHR's) of staff positions that provide for the services detailed in **Appendix D**. The FBHR's were used to determine the full cost of each service. They include the salary and benefit costs for each position as well as all applicable overhead amounts for each position as determined by the department they are assigned to. Refer previously to **Appendix A** for identifying the percentage overheads for each department. For any user fee service request that is outside the scope of the fees detailed in **Appendix D**, or for services for which there is no fee currently set, the City can notify and charge up to the full cost of the personnel, third party, or material cost involved to the service requestor.

Appendix C – Department Revenue Analysis

Below is the Department Revenue Analysis detailing current and recommended cost recovery estimates based on the proposed fees in **Appendix D**. Cities typically track revenue and fee activity through broader service purpose or at the department level only, which limits the accuracy of projections on what affect individual fee changes will have on revenue. To accomplish revenue projection estimates some assumptions about historical fee activity and revenue are made. Data used in the analysis consisted of City expenditures, historical revenues, and historical fee occurrence data. Willdan worked with staff to understand the connections between the revenue accounts, fee data, and the fees themselves so that the revenue change estimates are as accurate as possible.

City of Tustin - User Fee

Department Revenue Analysis

Department	Estimated Annual Costs Eligible for Recovery	Estimated Annual Current Fee Revenue	Current Cost Recovery Percentage	Recommended Cost Recovery Percentage	Estimated Annual Fee Revenue per Recommended Recovery Levels
City Clerk	\$2,501	\$902	36.1%	47.5%	\$1,189
Economic Development	\$10,292	\$4,200	40.8%	65.1%	\$6,700
Finance	\$34,119	\$10,227	30.0%	98.9%	\$33,747
Parks & Recreations ¹	\$2,423,447	\$1,249,000	51.5%	51.8%	\$1,254,441
Community Development - Planning ²	\$203,930	\$187,448	91.9%	100.0%	\$203,930
Community Development - Building	\$1,946,018	\$1,220,582	62.7%	100.0%	\$1,946,018
Public Works - Engineering	\$502,336	\$166,097	33.1%	97.1%	\$487,962
Police	\$51,680	\$30,536	59.1%	79.3%	\$40,975
Water - Billing Division ³	\$130,951	\$51,290	39.2%	94.7%	\$124,038
Total	\$5,305,274	\$2,920,283			\$4,099,000

¹ Estimated annual costs include divisions that directly provide fee services (Sports, Classes/Cultural Arts, and Support Services), as well as 10% for indirect support.

² Many Planning fees utilize deposits and therefore would be 100% cost recovered through time accounting by project

³ Water Billing Fees have been set at 100% cost recovery except for those that are limited by California State Law (Senate Bill No. 998)

Appendix D – Cost Recovery Analysis

The following tables provide the results of the analysis, resulting full cost recovery amount, and recommended fees. For fees in which the full cost, existing fee and suggested fee is listed as “NA”, the amount or percentage was not calculable based on cost data or variable fee structure. This is most common when either the current or the suggested fee includes a variable component that is not comparable on a one to one basis, a full cost was not calculated (for penalties, fines, and facility use), or when there is not a current fee amount to compare against.

221	<u>Appeal/Hearing Tasks</u> Notify persons; Prepare report; Attend hearing; and Provide written notice	\$390.00	per hearing	

Notes:

(*1) City Attorney; Special Counsel; City and Agency staff; and outside consultant fees to be reimbursed at the actual cost incurred to City.

(*2) A re-inspection fee shall be assessed for each inspection or re-inspection when such a portion or work for which inspection is called is not complete or when corrections called are not make. This subsection is not to be interpreted as requiring re-inspection fees the first time a job is rejected for failure to comply with the requirements of the technical codes, but as controlling the practice of calling for inspections before the job is ready for inspection or re-inspection.

(*3) Only when authorized by the Director of Community Development.

requirements for additional staff meetings, responses to correspondence/e-mails, the need for the City to engage outside consultants are to be reimbursed at actual staff and City Attorney/Special Counsel costs.
